

POLICIES and PROCEDURES

Nut Statement

All references to Juniper within this document refers equally to Juniper Ventures Limited and Juniper Pursuits Limited

Executive Summary

We ensure that all our recipes are nut-free and do not use any nut-related products in our dishes. However, Juniper cannot guarantee that all of the ingredients are sourced from 100% nut-free factories, and our suppliers are also unable to provide such guarantees.

From September 2024 and following a review of our product specifications, we are implementing additional measures to further enhance safety. We will introduce updated procedures to further ensure the highest standards of safety for children with allergies. This is part of our ongoing commitment to providing safe and nutritious meals for all students.

When there is a new menu developed or when a new supplier or product is introduced the following documents will be updated and distributed to all appropriate staff:

- 🌿 Nutrition Plan Listing with Allergens
- 🌿 Recipe Report with Allergens:

Each parent with a child known to Juniper as having a nut allergy will be written to individually whenever a change is made. An example of the letter is part of this document
